

Choose your Anchor

Users with low tone receive support and develop strength for improved functional sitting. For users with high tone or movement disorders, the Anchor provides stability for increased functional use of the free hand and arm. Anchors promote inclusion and social development for the user.

Anchors are short-term positioning aids and are not intended for primary standing support or transfers.

Hand Anchor: This ergonomic hand Anchor attaches to any smooth surface to achieve stability and positioning. No more drilling through wheelchair trays!
