

SoloLift

Transfer. Transformed.

One caregiver. Zero lifting. Endless possibilities.

The Rifton SoloLift is a groundbreaking mobile transfer device that creates a world of new opportunities for adults with disabilities, caregivers, and institutions alike. Its unique design makes it possible for one caregiver to transfer even large clients to and from chairs, wheelchairs, beds, gait trainers, and the floor – **with zero lifting**. It even makes transfers from a wheelchair into a forward-loading gait trainer virtually effortless.

Who's using the SoloLift?

The Rifton SoloLift is designed for use anywhere caregivers need to transfer individuals up to 350 lbs. In rehabilitation facilities, group homes, schools, and more, its compact design makes it easy to store and maneuver through a standard 32" door. Its simple, zero-lift operation ensures your staff will love it and use it for every lift, keeping everyone safe and injury-free, while reducing insurance and turnover costs for your facility.

APPROVED!

The SoloLift is now approved to safely transfer patients up to 350 lbs.

Why the SoloLift?

- 1. One caregiver, zero lifting, complete security:** The SoloLift finally makes it a reality.
- 2. Every transfer is easier:** Even from a wheelchair to a forward-loading gait trainer.
- 3. A more dignified, safer lift:** Only the SoloLift lifts in a natural sit-to-stand arc, providing unprecedented stability, even transferring into a forward-leaning position.
- 4. Easier toileting:** Its unique SoloVest lifts entirely from above the waist, so toileting is so much faster and easier.
- 5. Reduced injuries and costs:** Fewer staff lifting injuries can significantly lower insurance and turnover costs.

User-friendly and easy to operate

- Zero assembly required – just uncrate, roll out, and go.
- Easy-to-use push-button controls.
- Base and frame are compact; legs extend and retract with a foot pedal.
- Unintimidating low-profile lift arm.
- Innovative, snug-fitting SoloVest enables above-the-waist lifting, making toileting easier than ever.
- For seated transfers, the SoloLift's Leg Straps secure in seconds.
- Long-life, rechargeable battery pack powers 100+ lifts per charge; 2 chargers and a backup battery are included.
